LOCAL CONTROLS

AVA-S20.61 177in.lbs ON-OFF TIMER ELECTRIC ACTUATOR

Overview: All AVA smart electric actuators have local controls as standard which combine an OLED screen and 3 positive feel push buttons to create local control and a variety of user friendly adjustments. The bright screen with blue letters on a black background are easy to read, and the use of the push buttons to adjust settings is intuitive. The local controls require power to be applied to the actuator to operate.

Local controls:

M button	M button is used to enter and switch menus.
K2 button	K2 is used in conjunction with K3 for adjusting values.
K3 button	K3 is used for changing settings, navigating menus, exiting and saving.
OLED Screen	OLED Screen with clear blue letters against a black background

Standard local control function options:

- MANUAL CONTROL** The AVA smart actuator can be opened and closed using the K2 and K3 buttons
- DEAD BAND** Adjusts the accuracy and sensitivity
- SPEED CONTROL** The working time can be increased either by setting a step timer (run/stop/run/stop), or continuous running adjusting the PWM
- CLOSED POSITION** Small adjustments can easily and quickly be made to the final close position angle (zero adjustment).
- REVERSE ACTING** Receiving an open command signal sends the AVA smart actuator to the closed position and vice versa
- EXTEND ANGLE** Adjust the open position by adjusting the span. Typically used to set 0-180 degree operation
- 3 POSITIONS** Sets the 3rd position (subject to wiring system)
